

Leaf Count Activity Sheet

14
32

How many different leaf shapes can you spot?

You will need

- a pencil
- activity sheet

Leaves come in all different shapes and sizes. Why not go for a walk by the river and see how many different types of leaves you can spot.

Here are a few examples to get you started:

Can you spot any of these leaves along the river bank? Add them to your table (on the next page) and then get counting! See if you can spot any different ones.

Take it further

Can you work out which trees your leaves belong to? Add the name of the tree to your table.

Note to Parents:

Use the **Leaf Identification** help sheet (in Additional Resources for Parents) to help you/your children identify their leaves. Why not make a handy leaf key by printing, cutting out and laminating the leaves from the ID key, then attach them to a keyring.

Draw your leaf here	How many trees with this type of leaf can you spot? (do a tally)	What tree does it belong to?
